Practical - 11

Practical Title: Student Management CRUD with Search and Filter

Implement secure user registration by inserting user details into MySQL using MYSQLi. Validate input on frontend and backend, check duplicate email/username, hash passwords using password_hash(), and display appropriate messages.

BBB. Theory

1. Are SELECT, INSERT, UPDATE, and DELETE operations working? Answer - Yes, all CRUD operations are implemented and working.

2. Is search by name/email/course implemented? Answer - Yes, students can be searched by name, email, or course.

3. Are delete operations confirmed before execution? Answer - Yes, a confirmation is required before deleting a student.

CCC. Evidence of Work (Screenshots)
